EXECUTIVE SUMMARY

Experienced Data and Reporting Analyst with a proven track record in Identity & Access Management, RBAC, and access governance. Skilled in leading compliance reviews, developing access matrix models, and coordinating with stakeholders to ensure seamless access control. Adept at leveraging tools such as Okta to enhance security and streamline user access processes.

AREAS OF EXPERTISE

- Identity & Access Management
- RBAC Implementation
- Access Matrix Modeling
- Compliance Reviews
- Stakeholder Coordination
- Okta Integration
- Data Governance
- Business Intelligence & Data Visualisation

KEY ACHIEVEMENTS

Access Control Enhancement - EnergyAustralia - Implemented RBAC framework to enhance access control mechanisms for critical infrastructure systems. - Developed access matrix models to streamline user permissions and improve data security. - Led compliance reviews to ensure alignment with regulatory requirements and industry standards.

Okta Integration & Access Governance - AIG Australia - Spearheaded the integration of Okta for centralized identity management and access control. - Conducted access governance reviews to monitor and enforce data security policies. - Collaborated with stakeholders to define access roles and responsibilities, ensuring compliance with internal policies.

Identity & Access Management Framework - AIG Shared Services - Designed and implemented an Identity & Access Management framework to centralize user access across multiple systems. - Conducted regular audits to assess access controls and mitigate security risks. - Provided training and support to end-users on access management best practices.
